

Samuel's Imaginary Theorym

by : Samuel Hasiholan Omega Purba, S. Tr. T.

Teknik Elektro

Prodi Teknik Robotika dan Kecerdasan buatan

Politeknik Negeri Batam

$$\Omega = (\{6 \times (4 - \pi)\} - \pi)$$

$$\Omega = \left(\left\{ 6 \times \left(\frac{28 - 22}{7} \right) \right\} - \pi \right)$$

$$\Omega = \left(\left\{ 6 \times \left(\frac{6}{7} \right) \right\} - \pi \right)$$

$$\Omega = (-2)$$

$$2 = (-\Omega)$$

$$\sqrt{-1} = \left(\left\{ -\left(\frac{2}{2} \right) \right\}^{\left(\frac{1}{2} \right)} \right)$$

$$\sqrt{-1} = \left(\left(\frac{\Omega}{(-\Omega)} \right)^{\left(\frac{1}{(-\Omega)} \right)} \right)$$

$$\sqrt{(-1)} = \left(\frac{f(0\text{mega})}{f(-0\text{mega})} \right)^{(f(-0\text{me}))}$$

$$f(-0\text{mega}) = \{((-0\text{mega}) + \pi) - \pi\}$$

$$f(0\text{mega}) = \{\pi - ((-0\text{mega}) - \pi)\}$$

$$\sqrt{(-1)} = e$$

$$e = \left(\frac{f(0\text{mega})}{f(-0\text{mega})} \right)^{(f(-0\text{me}))}$$

$$\sqrt{(-1)} = \left(\frac{f(0\text{mega})}{f(-0\text{mega})} \right)^{(f(-0\text{mega}))}$$

$$e = (-|0,34740416688982559338631922050232|)$$

Conclusion :

“ Imaginary’s Variable values ($-|0,34740416688982559338631922050232|$)

”

~ Samuel Hasiholan Omega Purba, S. Tr. T. ~

Bachelor of Robotic’s Technology and Artificial’s Intelligent

[“ Politeknik Negeri Batam for International Future ”]
